
Q: What is the maximum power output per port on the 6-port PoE switch?

A: Each port provides up to 30W of power, compliant with IEEE 802.3at (PoE+), Backward compatible with IEEE 802.3af (PoE), suitable for devices like IP cameras and wireless access points.

Q: Can the 6-port 10/100M PoE switch extend Power and data connections beyond 100 meters?

A: Yes, some models support extended modes up to 250 meters, allowing for longer cable runs without additional equipment.

Q: Is the 6-port 10/100M PoE switch suitable for home use?

A: Yes, it is ideal for small networks, such as home security systems or connecting multiple smart devices requiring power and data.

Q: What type of devices can be connected to the 6-port 10/100M PoE switch?

A: Devices such as IP cameras, VoIP phones, wireless access points, and IoT sensors can be powered and connected through a 4-port 10/100M PoE switch.

Q: Does the 6-port 10/100M PoE switch require special installation?

A: No, installation is straightforward. Simply connect the switch to your network and plug in PoE-compatible devices. No additional configuration is usually needed.
